## **Update on week 27: Usability has been improved, errors related to entering numbers and other emergency numbers have been corrected**

Usability has been improved in the new version of the application, new features have been added and errors detected in the first version have been corrected.

The most important feature is the display of positioning precision in connection with location coordinates. In addition, the application will be available for downloading anywhere, whereas up until now, it has only been available for downloading in Finnish application stores.

In connection with deployment, the user has had to enter a telephone number several times before it has been saved when using either an Android phone or iPhone, for example. The error related to entering the number has been corrected in the new version.

The telephone number for MLL's (Mannerheim League for Child Welfare) Child and Youth Phone has been corrected on the *Other service numbers* tab.
